

FinSage – Terms & Conditions

1. Data Privacy & Ownership

Users fully own their financial data. FinSage only processes data to generate insights and never sells or shares personal information with third parties.

- All user data is:
 - Encrypted in transit
 - Stored securely
 - Used only for AI analysis

This shows judges:

- You care about **privacy**
 - You are **GDPR/RBI aware**
-

2. AI as Decision Support, Not Financial Authority

FinSage provides AI-powered financial guidance for educational and decision-support purposes only, not certified financial advice.

Meaning:

- Users make final decisions
- AI does not execute trades

- AI does not force actions

This protects you legally and ethically.

3. Explainability & Transparency

Every recommendation generated by FinSage is accompanied by an explanation of the reasoning behind it.

This builds:

- User trust
- Ethical AI compliance
- No black-box system

Judges love this.

4. Security & Access Control

FinSage uses secure authentication and role-based access to ensure only authorized users can access their financial data.

Includes:

- JWT / OAuth login
 - Encrypted APIs
 - No plaintext credentials
-

5. Third-Party API Usage

FinSage integrates with third-party financial and market data APIs and is not responsible for inaccuracies in external data sources.

Important because:

- Stock APIs can be wrong
- Bank APIs may delay

This shows technical maturity.

6. User Responsibility

Users are responsible for verifying financial decisions and outcomes before acting on any AI-generated suggestions.

This avoids:

- Legal liability
 - Misleading responsibility
-

7. No Data Selling / Ads

FinSage does not monetize user data, display ads, or promote sponsored financial products.

Judges will see this as:

- Ethical fintech
 - Trust-first product
-

8. Future Compliance Statement FinSage is designed to be compliant with future financial regulations such as RBI

guidelines, GDPR, and data protection frameworks when deployed at scale.

This shows:

- You think like a startup
- You understand regulation
